ALWAYS IMPROVING, ALWAYS LEADING —

LEHO Has Arrived

Your patient waiting for the "Ultimate" in stringed instruments is finally rewarded. Whether you have visited music shops or, attended various music festivals ... there is no longer any need to prolong your emotionally charged search for nirvana nor, for your very own, your very finest ...

Immerse yourself and swim in oceans-full of most pleasing and harmonious sounds while strumming any one of the several connoisseur instruments already available worldwide under the extremely popular "LEHO" brand. Continue to visit, shop, play and compare and, request: "I would actually love to now try a few LEHOs, please." Demonstrably leading-the-pack in every sonic and build aspect and finite detail, you will be entirely happy you asked ...

LEHO means "seashell" in native Hawaiian and all LEHO instruments produce the melodious, soulful, romantic sounds of Mother Nature at her most proud moment ...

Go anywhere, play anywhere!

Sample Nature's critically seasoned tonewoods to instantly expand, enhance, and easily uplift your own playing style and performance. From your most subtle pluck, picking and chord-strum nuanced breezes, to full-on tempests of sheer power: Now Command. Drive your playing, your accompaniment and solos with total confidence in your trustworthy and most faithful "LEHO" ...

LEHO is a joint-concern and is composed of consulting-partner Pro-Tour artists and expert Designers primarily located in California and Hawaii. Mutual collaboration from numerous "best-in-industry" corners is routinely and quite-purposefully the solid basis of ANY new LEHO model.

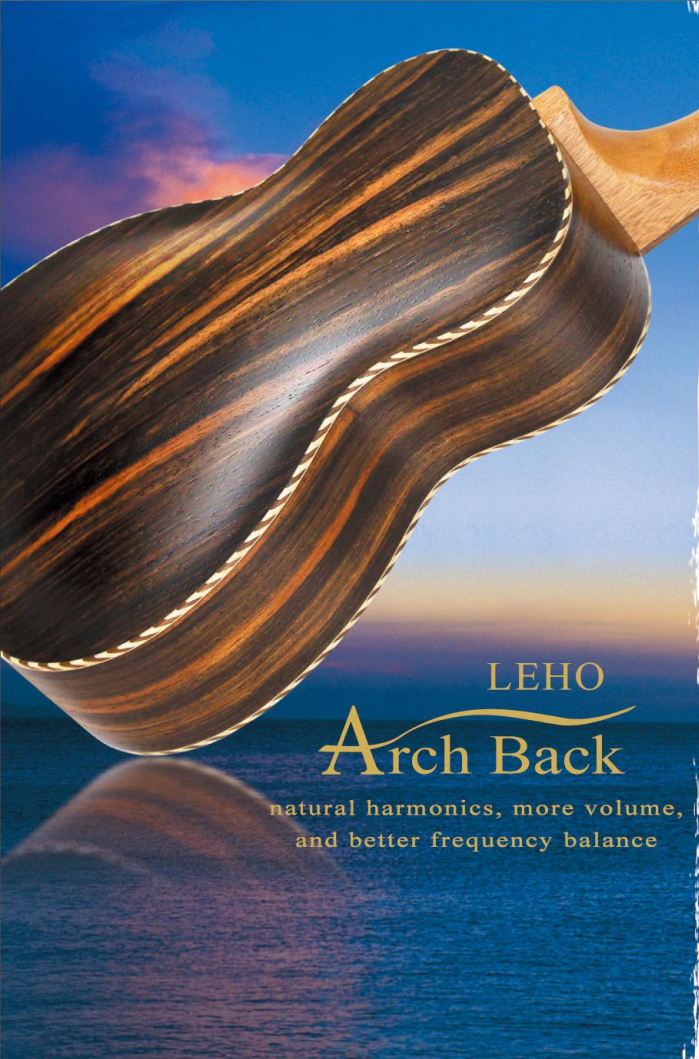

The LEHO "Core Team" possesses more than 300 years of experience in the artful, exquisitely adept Creation and Craftsmanship of every LEHO brand instrument. There can be No Doubt ...

LEHO models begin with the global search and savvy identification of the rarest of prime-only construction woods. After ambient-controlled, long-duration seasoning and other proprietary treatments, solely the critically tested and most sonorous materials are allowed to be used in manufacture. LEHO tonewoods preps are often acclaimed as "last-word" in this business ...

Where technology permits some override to achieve realistic price points, without sacrificing one iota of sonic reproduction, LEHO employs the latest, highly-advanced technical machineries for making some component parts. To assure strict consistency, such parts receive testing, testing, some rejection, and testing and testing in order to realize highest-quality only ... LEHO knows!

Many LEHO Hand-Builders and Finishers have 15-20 years experience EACH in the ART of stringed instrument construction and most are also, true musicians themselves! With an ear and a heart to what makes a REAL instrument and to what does not, LEHO artisans continue to uniquely offer you the "crème-de-la-crème" with each and every stringed instrument that proudly boasts the precious and coveted LEHO logo ...

Everyone at LEHO cordially invites YOU to "Enjoy the Music" with us. Always improving and always leading, your best possible investment in your next personal-music-partner is of course, and dependably, only "LEHO". We all, Warmly Welcome YOU to the New World of LEHO ...

LEHO
Arch Back
natural harmonics, more volume,
and better frequency balance

LEHO engineering team members are “not at all new” on the ukulele scene and many of our close-knit LEHO team engineers have more than 20 years experience in the careful design of ukuleles for various other ukulele brands that you already know. Our LEHO engineers grouped together in 2010-2011 in order to develop a final answer to all ukulele players as concerns true or actual performance response as regards practical, workable price-points for serious players who sincerely understand the difference in today's marketplace. Our timid observation is that the OLD, “tried and true” ukulele brands followers remain hung-up on the earlier ukulele brands regardless of country of origin.

LEHO finally resolves and distills the essence for offering you the best ukulele attack, harmonic responses, and pleasing decay as compared to any model in today's market; comparably, via any price point versus any response as compared to other competitive ukulele brands! (We have the scientific sonic or spectrum tests results in our audio labs)

LEHO engineers lit upon the challenges to develop the very best sounding ukuleles for the ukulele world and then underlined and highlighted each goal by priority back in 2011.

BEST WOODS SOURCES

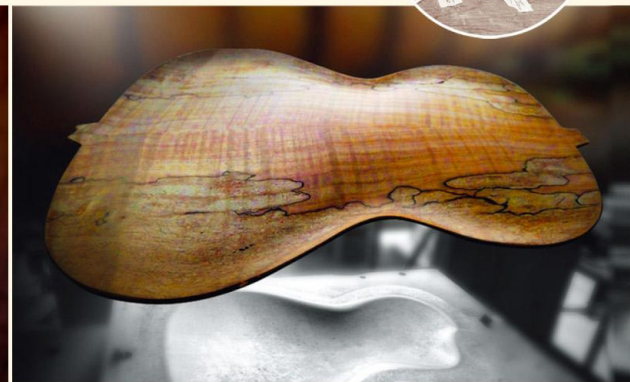

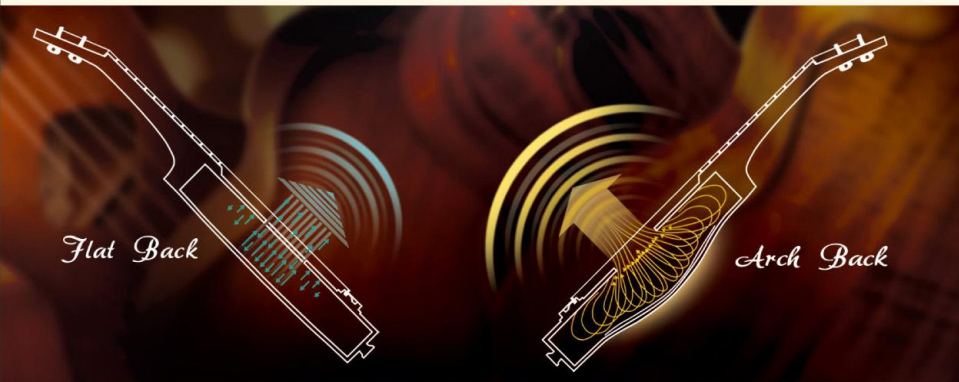

team experience identified the very best sources worldwide

BEST BODY and TOP BRACING PATTERN

we all noted the BEST and IMPROVED

BEST BODY DESIGN

from various "Top" ukes were studied and we indeed IMPROVED

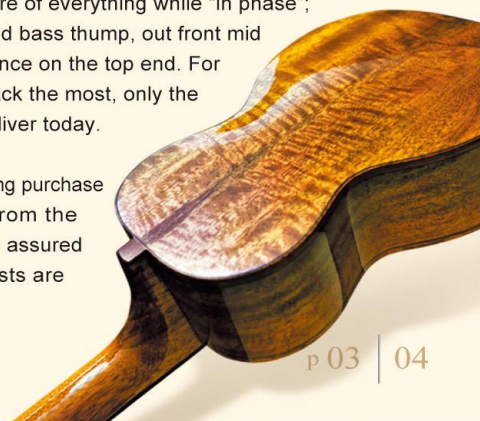

The LEHO Arch Back design was not easy to arrive at. Our engineers did not rely on any personal taste from our veteran team members. We remained looking for the exact width, the exact position, the exact depth of a scientifically proven back-arch that could BEST or hyper accentuate the broad and even harmonics or tonal attack and sustain of any string pluck; frankly speaking, this task required hundreds of hours and we did not start with competitor examples, LEHO engineering struck-out entirely on its own in order to define the best ukulele body. And now, you too can enjoy unending attack, shimmering harmonics, and ongoing brilliance...

The LEHO arch back keenly promulgates MUCH more volume; but just as one sonic property.

The LEHO arch back adds more of everything while "in phase"; appreciably more output, added bass thump, out front mid tones and, gads of extra brilliance on the top end. For any ukulele aspiring to give-back the most, only the LEHO brand can thankfully deliver today.

For your best and most comforting purchase choice, choose any model from the LEHO range of models and be assured that LEHO engineers and artists are behind your decision...

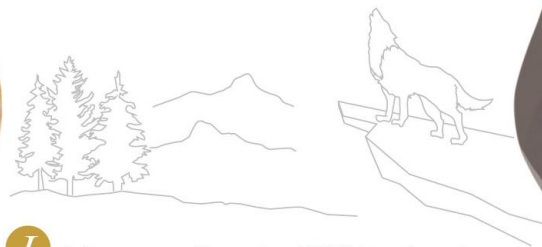

Specialty Series

With each of our LEHO staff artisans possessing decades of hand-built familiarity with so-called "Best Possible Sound" ukuleles, your LEHO Guild-Team joined ukulele experienced sales and marketing artists friends to establish "LEHO" about 10 years ago in order to finally deliver to "All Aspiring Pro and Beginner" ukulele players an entirely NEW line of very fine and welcoming models. Everyone involved at LEHO actively plays ukuleles and has owned so many and various top-notch legacy-acclaimed brands; hmm.

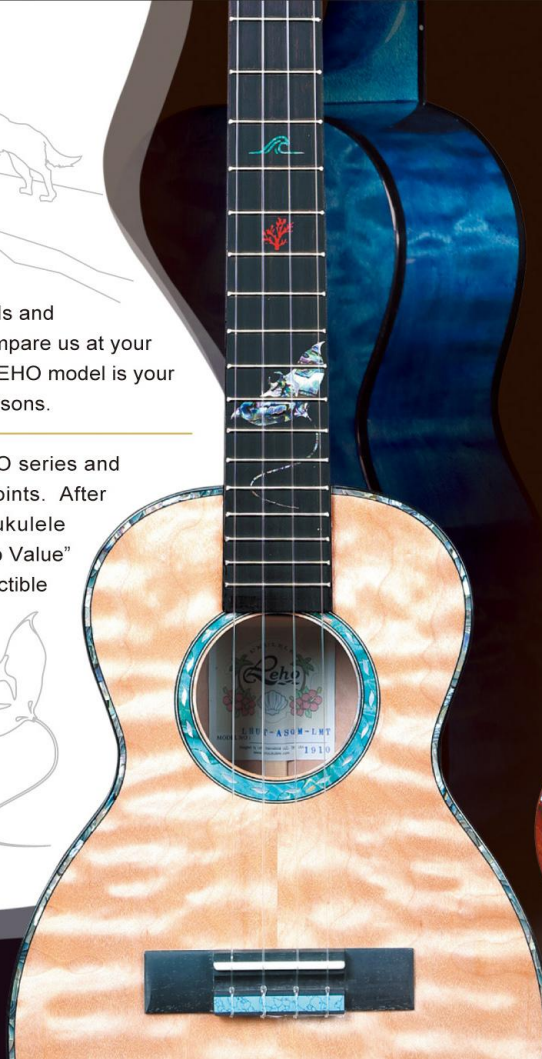

Your LEHO "Fills the Gap". As compared to otherwise available ukulele brands, logos, and those on the internet at so wordy blogs, LEHO does truly surprise, defend, and always proves itself under any and all solo and group conditions. In studio or on the beach.

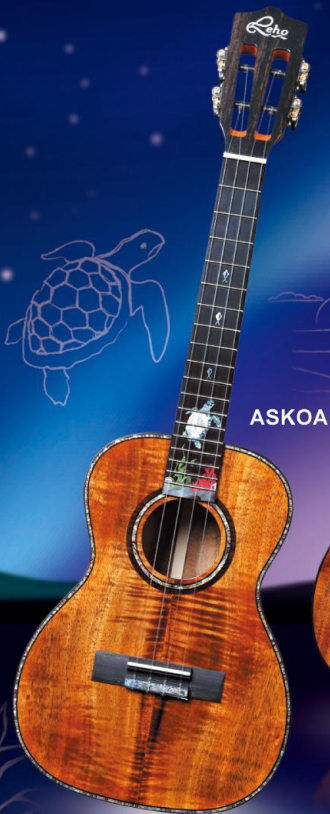

LEHO staff has actually traveled worldwide to interview ARTISTS, STUDIO ENGINEERS, PLAY GROUPS, BEGINNERS, . . . and Not limited to the already famous LEHO-Arch-Back ukulele build design, LEHO continues to PUSH-Ahead to the forefront numerous "Best in Class" innovations across all Price Points.

Let drop your notions about TOP brands and please take some demo or play time to compare us at your local ukulele Dealer. Make sure that any LEHO model is your reference "A" . . . in all your A to B comparisons.

You are cordially invited to compare LEHO series and models across All Woods and All Price Points. After cookies and cakes as seen across our ukulele industry, LEHO confirms its solid "Best Top Value" presence all around, with its new and collectible All Exotic Woods SPECIALTY SERIES . . . And so, the LEHO "Welcome Mat" lingers for sure; we thank you for your next-up demo with LEHO!

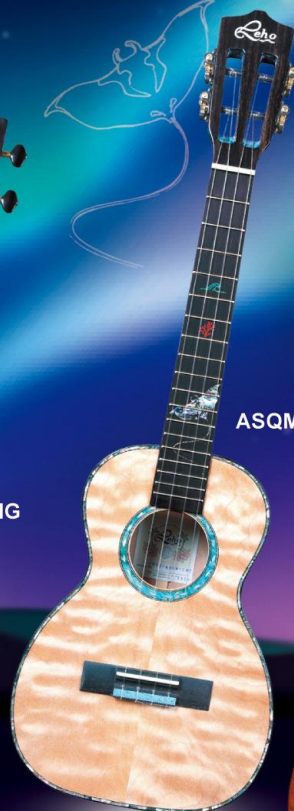

ASKOA

ASAK

ASMG

ASQM

ASMP

All Solid Koa (ASKOA)

Worldwide clamored for ... investment secure ... a big sound from the big Hawaiian island. In spite of fires, ever more stringent natural koa harvesting regs and such ongoing scarcities; LEHO brings you ultimate all koa topmost sounds and a look and price that you can soundly sleep with at night. Tasteful ocean floor and sea turtle designed inlays.

All Solid Acacia (ASAK)

Acacia koa is the cousin of Hawaiian koa and this venerable, most respected all solid woods set will assuredly surprise you with its unending, alluring sound traits. All Solid and All Pro only. Creative beach, surfboard, palm and flying birds inlay appointments.

All Solid Mango (ASMG)

With a grain structure echoing koa reliefs, this all mango model fulfills the desires and strict play needs of professionals and collectors who truly know ukuleles. Envious hints of lapis lazuli inlays in a "Great North" motif. All solid woods only.

All Solid Quilted Maple (ASQM)

Immerse yourself in the luxurious sound attack and sustain and overall response, and the exquisite look of Quilted Maple; all over this gem. Very pleasing transparent blue adorns the backside to highlight the contrasts in the exceptional quilting. Blues bound top.

All Solid Flame Maple (ASMP)

Flamed-up All Solid Maple sound response and exceptionally pleasing harmonic overtones; or those tones that you have always been hoping to find in a gorgeous, collectible ukulele. Beautiful laurel and floral inlays complete all this art, with ebony fingerboard and bridge.

The LEHO Acacia-Koa series offers rich cosmetics and the superior sonic properties of the koa tone wood family. Only hand selected solid, top-grade acacia woods are used in this series to create a very competitive and high-value choice for the most discerning players. Savor and enjoy the very look, the sounds, and the playability of so many Hawaiian koa boutique headstock logo models but without the customary surcharge. With solid acacia top or with cedar top.

● SH = Slotted Headstock Model

With elegant and generous wood grain spalting, this series offers excellent and very pleasing contrasts throughout the ukulele body. Beautiful, deep dimensional grain structure with the sweet overtones of maple. This series is a real winner to look at and to play. “Spalted” has become a very desirable wood alternative and LEHO spalting is among the very best.

The Pau Ferro series offers cosmetic coloration and grain structure rather similar to rosewood and the response and projection of rosewood back and sides too. The arch-backs will sometimes feature a tasteful, blond striping which is carefully book-matched for an additional, exquisitely pleasing look. All model variations have slotted headstock except for the soprano body.

With the musical sounds and look of the tropics, the LEHO Mango series woods offer beautiful mid-brown coloration accentuated by bold stripes of wonderful and darker browns. With flat tasty, unique cosmetics and a broad and wide tonal spectrum, mango is a dear favorite with Hawaiian and Tahitian players. It has also captured the fancy of many worldwide players in recent years.

The curly flaming in the Maple series is quite remarkable due to utmost discretion in sourcing the wood materials; and this flamed maple is among the best in today's market. Strong grain contrasts all over. The sweet tones of maple compliment a hip, fantastic look. With a strikingly responsive solid flamed maple top or with everyone's classic and smooth sounding cedar top.

With deep grain play of various shades of black and figured light-colored-woods binding, the Ebony series has a look like no other. The black look has become quite popular in recent years and the LEHO ebony series design is demonstrably one of the best sounding out there. LEHO processing assures an almost 3-dimensional woods look. A keepsake uke that forever shines.

Ziricote appears to overlay broad-brush brown to black stripes painted over an orange-brown background. This is a very artful and compelling wood choice that would seem to command a much higher price point due to its rich, thick, and exotic coloring. The sound is most appealing. LEHO's hand selection from so many examples of Ziricote assures you of the best available.

LEHO engineering adapts a custom spider-reso bridge system to a robust, laminated mahogany body. The overall design offers a rock solid carrier body as the reso plate pumps out its metallic sweetness above the efficient arch back. The LEHO resophonic is a “must” to try for any player. The uncanny tonal character adds an appreciable accent to both solo and group performances.

The already famous MM series cleverly combines the practical economy of rigid laminate construction without sacrificing musical response, given this full-body arch back design. For the price point, MM is the perfect step-up instrument for many players who are keen to own a well built ukulele model that inherently sounds “excellent”; and will indeed survive the long haul.

With a price and features position between the full-body arch back LEHO logo models and the student or starter “MyLeho” models, the “Aleho” logo exudes the craftsmanship and the quality of the LEHO range at a no-nonsense entry cost. Aleho is one of the most popular LEHO series. With a bit more of a flat back notion and with open-pore laminated Sapele woods, “Aleho” is truly today’s most top-value favorite.

MyLeho 156

The MyLeho line will continue to truly surpass the sound quality of colored, plastic ukuleles with its long-researched “polysonic” arch back and amazing sound output. To UP what was already UP in the market, the MyLeho 156 line boasts a “solid spruce top” which confirms astounding resonance, perfect for outdoors and a play at the beach too.

MyLeho 146

Sometimes mistaken for just another colored ukulele attempt, the “MyLeho” logo 146 series is every bit a LEHO and 146 represents the consummate or master choice for demanding players who wish to own a uke in one of 13 Hot colors and with genuine sound response and execution. The poly-sonic, molded body is impervious to most temp and humidity conditions and thus 146 is the perfect answer for long play on the beach, hiking, and camping. Dare to pick the color that moves you most.

● Available in various color finishes

Only rare and hand selected brunette with blond striped mahogany is used to create the “MyLeho” logo 2-Tone Mahogany series. Book-matching the construction woods requires extra manufacturing time in processing while the result is clearly fabulous. Unbelievable pricing for such handsome ukuleles. Altogether, a real Pro look and Pro sound choice for the first stepper.

Fashion meets culture in LEHO's grand sounding Round model. A stand-out and stunningly gorgeous approach in a ukulele-tuned-strings format, the pristine tonal response and the cut-and-carry of the Round ukulele will continue to amaze both soloists and ukulele group players. With a comfortably thinner front-to-back design, the large volume pocket boasts strong output.
